

Math 106 - 3

Syllabus

Spring 1998

Instructor: Blake Thornton, Building 122 (room #102), 581-4027

Email: thornton@math.utah.edu (this is probably the best way to get ahold of me)

Office Hours: Tuesday 11-11:50 (in the tutoring center), Wednesday 11-11:50 in my office, or by appointment. Unfortunately, I think I will have a class directly following our class almost every day.

Text: Precalculus: Functions and Graphs

Prerequisites: Math 105

Course Description: Chapters 4-6, 10-11 of the text.

Tutoring: Free tutoring is available in room 241 of Building 129 (East of JWB.) This is open 8:50-4:10 and 6-7 pm.

Homework: Homework is assigned for every section. This is only a guide. You may want to do more than the suggested problems.

Graphing Calculator You will need a graphing calculator for this class. You are required to know how to use the calculator for the homework and tests. (I am not a calculator help source, but do know a bit.)

Grades: There will be 4 or 5 in class exams (50 minutes) and a final: The final will be worth 30% of the grade and the remaining 70% will be weighted equally between the 5 (or 4) exams.

14%	Test 1	Friday	Apr 10	
14%	Test 2	Friday	Apr 17	
14%	Test 3	Friday	May 8	
14%	Test 4	Friday	May 22	
14%	Test 5	Friday	May 29	(Tentative)
30%	FINAL EXAM	Wednesday	June 10	12:45-2:45

Pet Peeves These are some things that will really bug me if you do them:

1. Not knowing where the tutoring office is (Building 129)
2. Not knowing where my office is
3. Pens on exams, especially red ones
4. Not telling me before you miss an exam
5. Needing another date to take the final (you know the date and its 10 weeks away).
